

Hello-

I am writing concerning SB 1105 .This proposed legislation would be detrimental to children with autism.Already there are not enough SLP's, special education teachers and psychologists to meet our students educational needs so adding additional responsibilities to these professions will not meaningfully increase the number of providers;it will stretch them even farther meaning less quality and quantity of service our children will need. Our children are complex and as it is school teachers, and staff do not understand their needs, how are they going to take on this role?

Thank -you,
